

PRESS RELEASE

Rennes, France, June 17, 2011

For immediate release

Velister Ltd, the commercial Digital Terrestrial Broadcasting Network Operator in the Republic of Cyprus, relies on ENENSYS products for SFN synchronization of their commercial DVB-T network.

ENENSYS Technologies brings Velister Ltd a unique and complete range of SFN products that removes all points of failure in their SFN DTT transmission network, while ensuring a flawless content distribution.

ENENSYS' end-to-end SFN solution is built around a high grade MIP inserter, which offers seamless switch-over thanks to the SFNguard technology. On each transmission site, the SynFoNizer, ENENSYS' redundant SFN distribution paths solution, guarantees seamless SFN switch between Velister microwave and Fiber Optic distribution networks.

"We are very proud to contribute to Velister DTT deployment in Cyprus with our DVB-T SFN solution" said Richard Lhermitte, VP Sales and Marketing at ENENSYS. He added "Building on the numerous references of ENENSYS in SFN delivery systems, and thanks to our local partner J&D dynamic Enterprises Ltd, we have been pleased to bring Velister our know-how to build this ambitious Digital Television deployment that accomplished the Cyprus Analog Switch Off."

"In our project, timing was of vast importance and Enensys provided us with all experience required to build and operate our network and be able to offer great quality of service to our customers from day 1. We would like to thank Enensys for their continued support" said Nestoras Nestorides, General Manager at Velister.

About Velister Ltd

Velister Ltd is a private company duly registered in the Republic of Cyprus that was recently awarded a 15 year license by the Office of the Commissioner for Telecommunications and Postal regulation as well as the Department of Electronic Communications of the Ministry of Communications and Works, to implement and operate the commercial DVB-T Network in Cyprus, following a spectrum auction process by the Cyprus Government.

The company is therefore a licensed Electronic Communications Operator in Cyprus to offer Electronic Communication Services through its cutting edge Digital Video Broadcasting Terrestrial Network. Initially the company facilitated the transition of the Republic of Cyprus to the Digital Terrestrial TV age by the 1st July 2011 and the subsequent termination of all Analogue Broadcasting. Following a very successful Analog Switch-Off the company plans to offer new services and add more channels on its platform.
